

designed, engineered and fitted...without compromise

a-type platform lift

from manufacture to installation our A-Type lift is totally flexible

a favourite among architects and engineers with its high quality and flexible construction, the A-Type platform lift fits well into all types of environment. This platform lift includes a free-standing enclosure in your chosen RAL colour. Alternatively, a glazed or stainless steel finish is available. The A-Type has a maximum travel of 12 metres and 5 stops.

operation

with its elegant controls and call-stations incorporated within the lift shaft, it is designed to give less able persons, including the visually impaired, ease of use.

no pit required

this lift can be installed direct to the floor, which means no expensive costs for excavation.

no machine room

as the control system is incorporated within the shaft, there is no need for a separate machine room.

safety first

all extreme edges of the platform have movable safety edges which immediately stop the lift when touched. The speed is limited and the control system is hold-to-run type. It is equipped with an emergency stop and alarm device.

technical data

Rated load	400kg / 1000kg
Rated speed	0.15m/s
Lifting height	12m
Number of stops	5
Control system	Hold-to-run
Drive system	Double V belt transmission to a rotating nut assembly. Driving nut and safety nut working on a fixed hanging screw.
Power requirements	415v or 240v
